Classroom management for Chromebooks, Windows, and Macs

Securly Classroom is a cloud-based classroom management tool for Chromebooks, giving teachers new freedom to guide, monitor and communicate with students during class. Remove distractions and keep kids focused on learning.

Features

Get class started fast

Teachers can push websites to individual students or the entire class, getting students on-task quickly, especially when using long URLs. Site Lock can also be used to open specific web pages on all student devices, for specific groups, or individuals, while blocking all other pages.

Screen Share

Teachers can share their screen with one or more students with an option to lock students into the screen sharing session. They can share their entire desktop, a single tab, or an application. Use audio capabilities for remote learning.

Screen Lock

To get the classroom's attention, use Screen Lock to provide a custom message like, "**Heads Up!**" Teachers can then release Screen Lock for the entire class or individual students.

Screen View

With thumbnail views of all screens in class, including all available open tabs, teachers can make sure everyone is on task. Screen View can also be used to present an individual student's screen, using a connected projector.

Control tabs

When a teacher is reviewing a list of all open tabs on a student's device, Tab Control allows them to select and close any site on that device.

Create custom block list

Teachers can block specific websites within their classroom, even those allowed by the school's content filter.

View tabs

Teachers can view all currently open tabs across all classroom devices, and then close any websites not related to the coursework in a single click.

Raise hand

When enabled, students are able to get the teacher's attention or ask for help using this special alert that appears as a glowing hand on the teacher's device.

2-way chat

Private chat sessions between student and teacher can be enabled (or disabled) to communicate sensitive issues or for questions during quiet times.

View browsing history

Teachers can check the browsing history of their students that occurred during class, while administrators can view all the history of all students.

Class Summary Reports

Teachers can receive an optional summary email for each class including participating students, most accessed sites, and more info.

Roster Integrations

Integrates with multiple class roster sources, including Google Classroom, Schoology, Canvas, Classlink, Clever, and OneRoster.

Screen Lock

To get the classroom's attention, use Screen Lock to provide a custom message like, "**Heads Up!**" Teachers can then release Screen Lock for the entire class or individual students.

Lost mode

When Chromebooks leave campus, they may get lost or stolen. This feature allows schools to locate missing Chromebooks on a map and view IP address changes to help get them back where they belong.
