

Barracuda Email Protection Plans for MSPs

Ensure customers' business, reputation, and employees are protected from the most advanced email-borne threats with a comprehensive Microsoft 365 security service offering. Barracuda Email Protection defends against all 13 email threat types, secures users from accessing malicious websites and files, protects data, enforces compliance, and much more.

Complete email protection

Adequately protecting your customers' email environments requires multiple layers of defense, and it starts with the email gateway. From blocking spam, defending against malware and impersonation, and protection from domain fraud, Barracuda Email Protection has you covered.

Global threat detection network

Barracuda combines a global threat intelligence database and artificial intelligence to stop email threats that others can't. Our intelligence database collects email, network, and application threat data from over 200,000 companies worldwide, allowing us to detect threats faster.

Automate email attack response

Respond to email attacks quickly and easily with automated incident response. Accurately identify the scope of the attack and remove malicious messages directly from impacted users' inboxes post-delivery.

Native cloud backup for Microsoft 365

Protect Microsoft 365 data including Exchange Online mailboxes, SharePoint Online, OneDrive for Business, and Teams. Provide fast point-in-time recovery if an accidental or malicious deletion takes place.

Enforce compliance and detect sensitive data

Meet customer compliance requirements with cloud archiving. Barracuda Cloud Archiving provides granular retention policies with unlimited storage and e-discovery capabilities. For customers with additional compliance needs, such as GDPR, CCPA, and other data privacy regulations, Barracuda Data Inspector lets you spot sensitive data when it appears in OneDrive or SharePoint. Data Inspector provides deep international support with data centers in the United States, EMEA, and APAC regions, spanning support in 26 countries, and 150 classifications for different types of sensitive data.

Protect against lateral attacks

The rise in remote employees, remote contractors, and BYOD policies has resulted in an increase in attack surfaces. Reduce the risk of lateral attacks with Barracuda Zero Trust Access for Microsoft 365 for continuous identity and trust verification of your customer's workforce and devices.

Elevate your email security service offering

Differentiate your MSP business from its competitors with Barracuda Email Protection which is easy to deploy and manage. Eliminate the hassles and risks associated with implementing standalone and disparate email security solutions.

Key Features

Email Gateway Defense

- Cloud-based protection against spam, malware, viruses, phishing, and other email-borne threats
- Advanced Threat Protection using full-system emulation sandbox
- Agentless email encryption and data loss prevention
- Link and typo-squatting protection
- Email continuity with failover to cloud-based email service
- Emergency mailbox to send, receive, read, and respond to email

Phishing and Impersonation Protection

- Direct connectivity to Microsoft 365
- Fast, easy setup (less than 5 minutes)
- Stops spear-phishing attacks, business email compromise (BEC), extortion, and other socially engineered attacks
- Artificial intelligence to detect and stop email attacks in real time
- Detects and alerts account takeover activity
- Notifies external users and deletes compromised email
- Blocks attackers' access to compromised account
- Provides visibility into inbox rule changes and suspicious sign-ins
- Threat environment analytics and reporting

Domain Fraud Protection

- DMARC authentication, reporting, and analysis
- Prevent domain spoofing and brand hijacking

Incident Response

- Outlook add-in and one-click threat reporting
- Security incident alerts
- Geographical insights
- Community-sourced threat data
- Recipient and behavior data
- Removes emails from user mailboxes
- Sets inbound email policies
- Blocks access to malicious web content
- Automatic remediation of malicious content
- Continuous remediation
- Automated workflow builder
- API integration for SOAR/SIEM/XDR platforms

Cloud-to-Cloud Backup

- Backup and recovery for Microsoft 365: Exchange Online, SharePoint Online, OneDrive, and Teams for Business
- Granular scheduling and restores
- Automated or manual backups
- Multi-selection restores
- Granular recovery of SharePoint items
- Restore back to Exchange Online or OneDrive for Business, or download files locally

Cloud Archiving

- Archive directly from Microsoft 365 to cloud-based archive
- PST management for legacy email
- Granular retention policies
- Full text search with multiple operators

Web Security

- Protects against web-based threats
- Web content filtering
- Web filtering logs
- Administrative reports
- Automatic alerts

Data Inspector

- Scans OneDrive and SharePoint for sensitive information and malicious files
- Malicious file identification
- Data classification settings
- Automated email notifications for admins, compliance officers, and users
- Role-based access control
- Advanced encryption capabilities

Zero Trust Access

- Phishing protection and threat blocking at the device level
- Role- and Attribute-Based Access Control policy engine
- Streamlined provisioning
- Global policy implementation
- Compliance

Barracuda Email Protection is available in three plans. Find the plan that’s right for you.
