Save

Cost & Increase ROI

- ✓ Zero-tiered dynamic auto-addition of licenses.
- ✓ Pay-as-you-go pricing and Usage-based billing.
- ✓ No multi-year lock-ins. Opt-out anytime.

WHY BACKUP

 Microsoft 365 ?

Microsoft 365 **Data Loss** is Prevalent and Damaging

81%

of companies lost Microsoft Office 365 data

only

15%

could recover it without third-party backup

WHY BACKUP

 Microsoft 365 ?

“ Microsoft Does Not Offer Point-in-time Recovery

If you want to support recovering messages beyond 30 days, you would need to use a 3rd party service for the backup. Point in time restoration of mailbox items is out of scope.

Microsoft

“ Backup Means No More Data Loss

Backup SaaS data or risk losing customers, partners, and employees.

Gartner

Backups are critical in ransomware recovery and response, if you are infected, a backup may be the best way to recover your critical data.

CISA

“ Regulations Mandate Backup

The controller should have the ability to restore the availability and access to personal data in a timely manner in the event of a physical or technical incident.

GDPR

It's Your Responsibility!

Microsoft's Shared Responsibility Model puts the onus of the data protection, backup, and recovery of your customer's data on you.

Easy Recovery from Ransomware and Data Loss

Mitigate the risk of ransomware and reduce the cost of downtime with quick data recovery. Encrypted and immutable SaaS backup with unlimited retention lowers your Recovery Time Objective and ensures seamless business continuity.

Native Workarounds are Time-bound and Cumbersome

Native workarounds like Litigation Hold and Recycle Bins are archival and not built for data recovery. Restoring data is tedious and after the time limit, data is permanently deleted.
